MSUFCU MyDesignSM Card Image Guidelines

Image Size

- Picture file must be a JPEG (.jpg, .jpeg), PNG, or GIF file with a minimum size of 1033 pixels by 657 pixels.
- Small pictures will print poorly. For best results, use larger images with higher resolutions. MSUFCU does not recommend resizing pictures smaller than 1033 pixels by 657 pixels to fit within the MyDesignSM Card dimensions.
- We recommend using photo editing software (such as Microsoft Picture Manager, Paint, Photoshop, GIMP, etc.) to resize an image to the required dimensions.

Uploading Your Image

- The larger the file size, the longer it will take to upload.
- If creating your MSUFCU MyDesignSM Card at home, your image must be downloaded to your computer's hard drive before it can be uploaded to the MyDesignSM Visa Card Creator within ComputerLine.

Tips for a Successful Design

- Review the look of your card before submitting your order to verify that the image is placed exactly how you want your card to look.
- There may be a slight color variation between your uploaded image and the way the image appears on the printed card.
- Pay special attention to where the MSUFCU and Visa logos and other elements such as the card number and your name are located. Make sure the main part of your image isn't covered by the logos on your MyDesignSM Card and your name and card number are visible.
- Images that are blurry, too dark, or too light on screen will appear that way when the card is printed.
