# SMART SHOPPING

NAME

Mia is out running errands. She has $100 in her wallet and six items on her shopping list. Help Mia calculate how much each item costs with 6% sales tax and then add up all six items to determine if she has enough money for what she needs. The first one is done for you.

Remember, for every dollar spent you add $0.06 in sales tax.

| Item | Item Price | Sales Tax | Total Price |
|------|-----------|-----------|-------------|
| Shirt | $15.00 | $0.90 | $15.90 |
| Flip Flops | $7.00 | | |
| Shorts | $16.00 | | |
| Swim Suit | $21.00 | | |
| Sweatshirt | $19.00 | | |
| Tennis Shoes | $32.00 | | |
