

DIY Bird Feeder

Directions:

With help from an adult, collect the supplies and follow the steps below to build a bird feeder of your own.

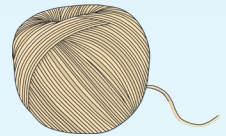

Supplies:

1 Large Orange

2 Wood Dowels

Twine or Yarn

Bird Seed

Knife

Scissors

Spoon

1. Start by cutting the orange in half and use your spoon to remove the fruit from the inside of the orange. This will leave you with an orange peel cup.
2. Poke each dowel from one side of the orange to the other, making them cross in the middle.
3. Next, you will cut two pieces of twine, about 1 ½ feet long each.
4. Tie each end of the twine to each side of the dowel.
5. Fill the orange cup up with bird seed and hang on the tree of your choice.
Note: Be careful when you walk not to spill the bird seed!
